Greetings Rene

I will be delighted to give you permission to use any of my locomotive photographs.

You can see which loco is 1930 and which is 1931 by the shape of the builders plates. They are only on the left hand side of the locos on the motion brackets. Number 1930 was built by North British and has a diamond shape plate. Number 1931 was built by Vulcan foundry and has an oval shaped plate.

Regards

Richard

Hello Richard,

Thank you for sending these incredibly beautiful picture of the WD 2-8-0 in Sweden. May I use one of them on my page dedicated to the 4300 class?

<http://www.modelrailroading.nl/collection/NS4300/index.html>

Of course with full reference and your copyright
